RTi Announces Partnership with PureCycle Technologies

Fort Worth, Texas – [RTi](#) announced a partnership with PureCycle Technologies, which has licensed revolutionary breakthrough recycling technology from Procter & Gamble that creates ultrapure virgin-like, odorless and contaminant-free polypropylene from mixed-colored polypropylene feed streams. Unlike current processes today that produce gray/ black polypropylene, this process creates clear polypropylene from post-industrial recycling and postconsumer recycling feedstock streams.

“RTi was chosen by PureCycle Technologies for our deep domain expertise in the resin markets and our commitment to the recycling industry. We are celebrating our 20th year in the resin business, we know that this is an amazing breakthrough that will positively impact our landfills and oceans,” said Bill Bowie, RTi’s Managing Partner, and Co-Founder.

RTi and PureCycle Technologies will showcase this latest technology at the upcoming NPE2018 May 7-11 at the Orlando County Convention Center in Orlando, FL. (RTi Booth #S12023).

RTi was hand-picked by PureCycle Technologies to provide both offtake and feedstock agreements to support the first plant in Lawrence County, Ohio. The plant is scheduled to come online in the second half of 2020. “This is a case where a hundred-billion-dollar industry required new technology to meet a compelling, unmet need,” said Mike Otworth, CEO of PureCycle Technologies. “Until now, recycled PolyPropylene had limited applications. We are removing those limitations and giving companies a choice to use more sustainable, recycled resins.”

About RTi

RTi is a trusted technical consulting firm that helps clients optimize their resin, plastic, and paper packaging categories since 1998. RTi empowers clients to achieve both immediate and sustainable savings. RTi partners with procurement to provide real-time information and best-in-class pricing by having insight into billions of pounds of resin benchmarks. For more details:

About PureCycle Technologies

PureCycle Technologies offers the only recycled polypropylene with properties similar to virgin polymer. PCT's proprietary process removes color, odor, and other contaminants from recycled feedstock resulting in virgin-like polypropylene suitable for any PP market. PureCycle Technologies licenses technology from Procter & Gamble and is operated by Innventure, a Wasson Enterprise Partnership. To learn more, visit <http://www.purecycletech.com/>.

About Innventure

Innventure, a Wasson Enterprise Partnership, has more than 20 years of experience identifying disruptive technologies and creating successful new companies. The group combines the expertise of Wasson Enterprise (WE), a family-based investment firm led by former Walgreens Boots Alliance CEO Greg Wasson, and former XL Tech Group (XLTG) executives, Innventure's precursor company.
